

Night Stalker of Velldenar

Chapter 1

The city of Velldenar never truly slept.
Even in the deepest hours of night, when the moons had set
and the stars burned cold and distant above the spires,
something always moved in the shadows.

Kael had learned this the hard way.

He pressed himself against the slick stone of the alley wall,
his breath a controlled wisp of vapor in the freezing air.
Three guards stood at the iron gate ahead.
They had not seen him. They never did.

That was the gift â and the curse â of what he had become.
